Declaration at: [language.ads: 253: 4](#)

Same as Skip\_To\_Current\_Comment\_Block\_Start, except we move forward to the beginning of the last line of comments in the block. If Ignore\_Blank\_Lines is set to True, blocks separated from one another with blank lines are considered as a single one.

#### Parameters:

Context	: in	Language_Context
Buffer	: in	String
Index	: in out	Natural
[Ignore_Blank_Lines	: in	Boolean := False]
